

COPPER LOCKER

Patent No: US 9,890,566 B1

Surface Mounted Bridge Box.

The DE-3000 series boxes are designed to be a theft deterrent for any exposed accessible location. They are constructed of 3/16 stainless steel and will accept a Pro Series Master Lock. The covers are held in place and secured with the lock and are stabilized with two mounting screws.

The DE-3000 has four 1/2 inch holes for mounting and is accessed from the inside of the box.

The DE-3000 being stainless and having drain ports is suitable for outside conditions as long as weatherproof electrical connections are used within.

The DE-3000 box may be ordered with holes pre-cut for conduit entry for an additional charge of \$8.00 per opening.

The DE-3000 is made to order to your specific dimension. For instance if you want an 8x8x6 box you would order the DE-3000-886
